Test Document

For testing reference styles of journals in environmental microbiology and microbial ecology

Journal: *Applied and Environmental Microbiology*

Some sample text

This is how an article reference looks like Angel et al. [1] and another article from the same year and first author Angel, Claus and Conrad [2]. An article with many authors Boetius et al. [3]. An article with exactly 7 authors Ofiţeru et al. [4]. Article with only 2 authors Penning and Conrad [5]. Same authors a year earlier to test the order of appearance in the references Penning and Conrad [6]. An article cited only by year (2012). Citing two references at once Oremland and Culbertson [8], Heckman et al. [9]. A book chapter Belnap and Eldridge [10]. And an entire book Fenchel, King and Blackburn [11].
